

Safety Precautions

Safety always has and always will be our #1 priority. We take your safety very seriously.

As of November 19, 2020, there are no documented cases of Covid19 transmission in a dental setting. Millions and millions of dental visits have occurred since the pandemic began and no cases have been traced to a dental office. This is great news! Rest assured that Lake Family Dental goes above and beyond the CDC recommendations to make sure you and your family are safe. Call or text our office for an appointment: 303-346-8000

Below is a short list of precautionary measures we have implemented:

- Advanced Air Ventilation - We run eight HEPA13 air purifiers at all times. This is in addition to our top-of-the-line HVAC system that was designed and built to the highest quality standards.
- Patient and employees are screened for signs/symptoms of Covid19. Anyone with symptoms of Covid19 will delay treatment. Employees are screened throughout the day as well.
- We bleach our protective clothing after every use. We have onsite laundry which makes this possible.
- We use N95 respirators covered with level 3 surgical masks during treatment.
- Every treatment room is thoroughly disinfected after each use. Common areas are disinfected throughout the day as well.
- Intra-oral suction devices are used to minimize aerosols.

As always, we are ready to answer any questions you have. Please let us know how we can help! Call, text, or email for an appointment: 303-346-8000 or info@mylakefamilydental.com

Warm Regards,

Matthew Lake, DMD and the Lake Family Dental Team
